Re: Protect League City's Business & Residents from San Jacinto Waste Pits

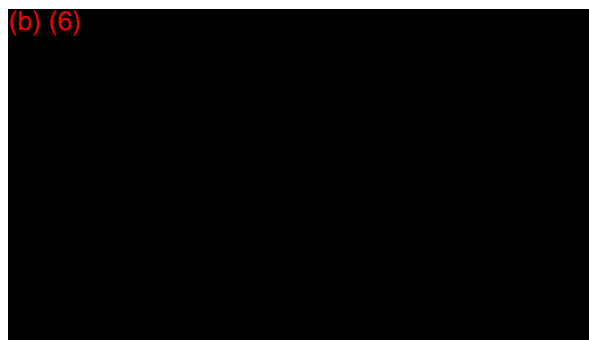

Dear Mr. Miller:

As a business owner/manager in League City, I am very concerned about the lengthy decision-making process regarding the San Jacinto River Waste Pits. This has gone on for years, and it's been far too long.

The residents of Harris and Galveston counties deserve an immediate and permanent solution to keep the Superfund site's hazardous materials from spreading. I fully support a permanent cap and I hope that you and your colleagues choose to support us and our health, livelihoods, and communities at large.

Sincerely,

(b) (6)
